

android.graphics.drawable.
ShapeDrawable.ShaderFactory

mono.android.IGCUserPeer

crc64b5e713d400f589b7.Radial
GradientShaderFactory

```
graph BT; A[crc64b5e713d400f589b7.Radial GradientShaderFactory] --> B[android.graphics.drawable. ShapeDrawable.ShaderFactory]; A --> C[mono.android.IGCUserPeer]
```

The diagram illustrates a class hierarchy or inheritance structure. At the bottom, a grey box represents the base class: `crc64b5e713d400f589b7.Radial GradientShaderFactory`. Two blue arrows originate from this box and point upwards to two separate white boxes. The left white box represents the class `android.graphics.drawable.ShapeDrawable.ShaderFactory`, and the right white box represents the class `mono.android.IGCUserPeer`. This indicates that the bottom class inherits from or implements both of the classes above it.
