

androidx.recyclerview.widget.
RecyclerView.ItemDecoration

mono.android.IGCUserPeer

crc645d80431ce5f73f11.Spacing
ItemDecoration

```
graph BT; A[crc645d80431ce5f73f11.Spacing ItemDecoration] --> B[androidx.recyclerview.widget. RecyclerView.ItemDecoration]; A --> C[mono.android.IGCUserPeer]
```

The diagram illustrates a class hierarchy or inheritance structure. At the bottom, a grey box represents the base class: `crc645d80431ce5f73f11.Spacing ItemDecoration`. Two blue arrows originate from this box and point upwards to two separate white boxes. The left white box represents the class `androidx.recyclerview.widget. RecyclerView.ItemDecoration`, and the right white box represents the class `mono.android.IGCUserPeer`. This indicates that the bottom class inherits from or implements both of the classes above it.
