

android::graphics::  
drawable::LayerDrawable

mono.android.IGCUserPeer

crc6452ffdc5b34af3a0f.Maui  
LayerDrawable

```
graph BT; Maui[crc6452ffdc5b34af3a0f.Maui LayerDrawable] --> Android[android::graphics::drawable::LayerDrawable]; Maui --> Mono[mono.android.IGCUserPeer];
```

The diagram illustrates a class hierarchy or inheritance structure. At the bottom, a grey box represents the base class: `crc6452ffdc5b34af3a0f.Maui LayerDrawable`. Two blue arrows originate from this box and point upwards to two separate white boxes. The left white box represents the Android native class: `android::graphics::drawable::LayerDrawable`. The right white box represents the Mono Android interface: `mono.android.IGCUserPeer`. This indicates that the Maui class inherits from or implements both the Android native class and the Mono interface.
