

android::webkit::WebChrome
Client

mono.android.IGCUserPeer

crc6452ffdc5b34af3a0f.Maui
WebChromeClient

```
graph BT; MauiWebChromeClient[crc6452ffdc5b34af3a0f.Maui WebChromeClient] --> WebChromeClient[android::webkit::WebChrome Client]; MauiWebChromeClient --> IGCUserPeer[mono.android.IGCUserPeer];
```

The diagram illustrates inheritance relationships between three classes. At the bottom is a gray box representing the base class: `crc6452ffdc5b34af3a0f.Maui WebChromeClient`. Two blue arrows point upwards from this box to two white boxes above it. The left white box represents the `android::webkit::WebChrome Client` class, and the right white box represents the `mono.android.IGCUserPeer` class. This indicates that the Maui WebChromeClient class inherits from both the Android WebChromeClient and the Mono IGCUserPeer classes.
